

A high-complexity CLIA accredited laboratory, MedArbor Diagnostics assists clinicians and health care providers to quickly identify the pathogens and underlying causes of disease.

We know better patient outcomes are achieved through fast, accurate, and reliable laboratory results.

UTI ID Panel

MedArbor's comprehensive molecular UTI panel provides results faster, making data more relevant, meaningful and reliable.

Testing with high sensitivity and specificity identifies pathogens difficult to grow in standard cultures reducing "no growth" results and allows for polymicrobial detection.

Polymerase Chain Reaction (PCR) - Molecular Technology

- Diagnosis based on the detection of specific DNA strands.
- Identifies antimicrobial resistance markers
- Identifies Fungi
- Detects polymicrobial infections
- Infection based treatment guidance
- Superior test for re-current UTI's

Now you can provide patients the quickest and most accurate diagnosis possible.

- 24 hour turn-around time from the time the lab receives the sample
- Virtually no "contaminated" results
- Decreased progression of infection & reduced healthcare costs
- Improves antibiotic stewardship
- Enhances the ability to appropriately assess and manage UTIs.

Pathogens Detected

- E. Coli
- Staphylococcus aureus
- Staphylococcus saprophyticus
- Enterococcus faecalis
- Ureaplasma urealyticum
- Mycoplasma hominis
- Candida species
- Proteus mirabilis
- Klebsiella pneumoniae
- Morganella moranii
- Serratia marescens
- Klebsiella oxytoca
- Enterobacter cloacae
- Providence suartii
- Psuedomonas aeruginosa
- Streptococcus agalactiae
- "Resistance Marker Panel"
- "Enhanced Treatment Guidance"
