

A high-complexity CLIA accredited laboratory, MedArbor Diagnostics assists clinicians and health care providers to quickly identify the pathogens and underlying causes of disease.

We know better patient outcomes are achieved through fast, accurate, and reliable laboratory results.

Wound Panel

Quickly manage skin and soft tissue infections, avoid delays in diagnosis and prevent infections from progressing.

MedArbor's comprehensive molecular wound panel provides results **faster**, making data more relevant, meaningful and reliable.

Comprehensive Wound Panel Includes:

- 24 hour turn-around time on all test results
- Definitive polymicrobial detection
- Candida Panel
- Detection of Antibiotic Resistance Markers
- "Enhanced" Antimicrobial Treatment Guidance

Easy sample collection and fast, accurate comprehensive results

- Requires just one wound swab
- Helps reduce treatment failures
- Supports antibiotic stewardship initiatives
- Provides unmatched accuracy of PCR
- One swab, one test, 24 hours – comprehensive polymicrobial pathogen and ABR detection results, plus enhanced treatment guidance
- Access to scientific, clinical and pharmaceutical support staff

Pathogens Detected

- Acinetobacter baumannii
- Bacteoides spp.
- Citrobacter freundii
- Clostridium novyi
- Clostridium septicum
- Clostridium perfringens
- Enterobacter aerogenes
- Enterobacter cloacae
- Enterococcus faecalis
- Enterococcus faecium
- Escherichia coli
- Kingella kingae
- Klebsiella oxytoca
- Klebsiella pneumoniae
- Morganella morganii
- Proteus mirabilis
- Proteus vulgaris
- Pseudomonas aeruginosa
- Staphylococcus aureus
- Streptococcus pyogenes
- "Candida Panel"
- "Resistance Marker Panel"
- "Treatment Guidance"
