

A high-complexity CLIA accredited laboratory, MedArbor Diagnostics assists clinicians and health care providers to quickly identify the pathogens and underlying causes of disease.

We know better patient outcomes are achieved through fast, accurate, and reliable laboratory results.

Women's Health

At MedArbor Diagnostics, we provide OB/GYN clinicians with the latest in molecular diagnostic testing, allowing for fast, accurate, and comprehensive screenings across a broad spectrum of pathogens and genetically influenced conditions.

MedArbor's Comprehensive Women's Health Panel Includes:

- 5 panels comprised of 32 total targets - 27 pathogens and 5 flora
 - Bacterial Vaginosis
 - Aerobic Vaginitis
 - Candida
 - STI
 - Genital Ulcer
- A la carte 35th Week Strep

Now you can provide patients with the quickest and most accurate diagnosis possible.

- 24 hour turn-around time on results (from the time specimen arrives at the lab).
- Identifies pathogens which are difficult to culture
- Yields greater than 95% analytical sensitivity and specificity
- Simple sample collection utilizing a single vaginal swab
- Direct access to experienced clinical and scientific staff
- Personal customer service experience
